

VAISAKH MULLASSERY

Senior Frontend Engineer | React.js| Real-time Applications | Node.Js

Senior Frontend Engineer with 7 years of experience building scalable, high-performance web applications using React.js and TypeScript. Expertise in developing real-time, data-driven dashboards, designing reusable component architectures, and managing complex application state. Strong experience in API integration, performance optimization, and building production-grade enterprise applications. Hands-on exposure to Node.js backend development.

WORK EXPERIENCE

Senior Engineer | Tata Elxsi

09/2022 – Present

- Developed real-time HMI and monitoring dashboards for industrial systems using **JavaScript, HTML5, and SCSS**.
- Built scalable, reusable UI components for visualizing live machine data and dynamic parameters.
- Designed data-driven interfaces for real-time updates and multiple data streams
- Contributed to full-stack development using **React.js**, TypeScript, Node.js, Express, and PostgreSQL.
- Integrated REST APIs and implemented Redux-based state management with optimized rendering performance.
- Collaborated with cross-functional teams to deliver production-ready solutions across the full development lifecycle.
- Designed secure authentication and role-based access control for enterprise applications

Software Engineer | Trenser Technology Solutions

05/2022 – 09/2022

- Contributed to a React-based healthcare application for medical imaging and clinical workflows
- Developed UI components for image viewing, annotation, and validation features
- Built data-driven interfaces to handle medical datasets and improve usability for end users
- Collaborated with cross-functional teams to enhance application performance and reliability

Infrastructure Engineer – IoT & Web | UL Technology Solutions

09/2019 – 04/2022

- Developed a real-time IoT-based monitoring platform using React.js, integrating data from flow meters and sensors into interactive dashboards and map-based visualizations
- Built scalable, data-driven UI with charts, filters, and anomaly detection, handling continuous data streams and large datasets efficiently
- Implemented REST API integration, user authentication, and role-based access control, collaborating on end-to-end system integration for real-time monitoring

Squad Executive (Part-Time) | Talrop Technologies

03/2017 – 03/2018

- Supported developer training programs through hands-on sessions and mentorship
- Assisted in early-stage project development and technical learning initiatives

PERSONAL PROJECTS

MineFleet AI – Real-Time Autonomous Fleet Monitoring Platform (In Progress)

- Building a React.js and TypeScript based platform for monitoring autonomous mining vehicles and industrial assets in real time.
 - Implementing dashboards, charts, and mine-map visualization using WebSockets and IoT telemetry data.
 - Developing backend services with Node.js and PostgreSQL, including authentication and reporting features.
 - Exploring AI-driven anomaly detection and predictive maintenance capabilities.
- Technologies: React.js, TypeScript, Node.js, PostgreSQL, WebSockets, Docker.

HONORS & AWARDS

- Extra Miles Award
- Customer Appreciation Award

CERTIFICATIONS

- Certified Scrum Master
- PG Diploma in IOT and AI Industry 4.0
- React Full Stack Developer (Present)
- Angular and JS udeMy

EDUCATION

2018 - 2019

NIEIT Calicut

- PG Diploma in IOT and AI Industry 4.0

2014 - 2018

School of Engineering, CUSAT

- B.Tech in Computer Science and Engineering

SKILLS

Core Languages

- HTML5, CSS3

Frontend (Primary)

- React.js, TypeScript, JavaScript (ES6+), Next.js**
- Hooks, Custom Hooks, Context API
- Redux Toolkit, Context API, MUI(basic)
- Reusable Component Design, Modular Architecture
- Design Systems (basic understanding),
- Data Handling:** REST APIs, Axios, API Error Handling & Caching Strategies
- Backend:** Node.js, Express.js, REST API development, SQL & PostgreSQL (Basic Understanding)

Performance

- Code Splitting, Lazy Loading, Memoization (useMemo, useCallback), Rendering Optimization

Testing:

- Unit Testing(Jest (Basic))

Tools

- Git, Docker (Basic), CI/CD

Additional (Basic Understanding / Exposure)

- Angular**, ML, Python, IoT, Java, AWS, Frontend Architecture Design, Scalable Application Design, Debugging (Chrome DevTools, React DevTools)

Soft Skills

- Team Collaboration
- Time Management
- Leadership
- Project Coordination
